

CETIAT *ENABLES TECHNOLOGY TRANSFER* for industrial organisations in all sectors

MEMBER COMPANIES

Aldes, Atlantic, Bosch, Camfil, Carrier,
Delta Neu, BDR Thermea, Fives,
Frisquet, Lennox, Systemair, Vaillant,...

NON-MEMBER COMPANIES

Buderus, Daikin, Mitsubishi,
Stiebel Eltron, Toshiba, Unical,...

HEATING, AIR CONDITIONING AND AIR HANDLING

INDUSTRIAL ORGANISATIONS / BUSINESS PARTNERS FROM A WIDE RANGE OF SECTORS

Ademe, Airbus, CEA, Clextral,
EDF, Essilor, Gerflor, GRDF,
Hermès, Hexcel, Lactalis, LNE,
LU, PSA, Samsung, Sanofi, SEB,
Solvay, Terreal, Total, Volvo,...

KEY FIGURES

- ✓ **135** employees, including **118** engineers and technicians
- ✓ **13.3 M€** turnover in 2019, and **865 k€** in investments
- ✓ **343** member companies, (heating equipment, ventilation, air conditioning, dust removal, filtration, air humidification, de-humidification, etc.)
- ✓ More than **2,500** client companies across **twenty industrial fields**

RESOURCES

High-tech equipment

- 50 multi-purpose test platforms
- 6 calibration laboratories, including three national standards (hygrometry, liquid flow metering and anemometry)
- Simulation and modelling software
- Reference organisation for training purposes
- IT resources for technical information (technology & standards monitoring)

ISO 9001: 2015 certification - covering the quality Management System for all activities

Accredited by COFRAC

(The French national accreditation body) for its calibration and test services (Scope available from www.cofrac.fr)

Technical Centre for Heating, Air Conditioning and Air Handling Industries

Domaine scientifique de la Doua
25 avenue des Arts
BP 52042
69603 Villeurbanne Cedex
France

Tel.: +33 (0)4 72 44 49 00

SUSTAINABLE **SUPPORT**
FOR INDUSTRIAL INNOVATION

CETIAT - A KEY PLAYER IN THE INDUSTRIAL INNOVATION ECOSYSTEM

Founded in 1960 at the request of heating, air conditioning and air handling system manufacturers, CETIAT is an independent, impartial and private organisation, creating bonds between industry and research.

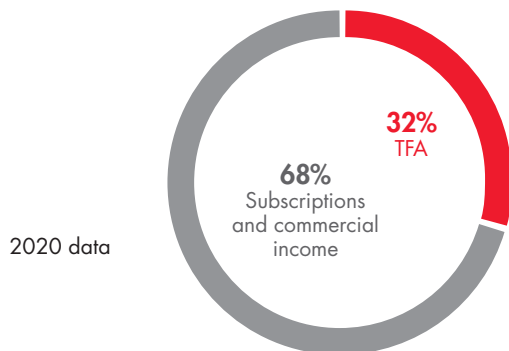

As an expert organisation for R&D, tests, calibrations and training, CETIAT enables industrial firms with the means and skills to better design, develop and manufacture their products and processes, to evaluate and improve their performance.

By supporting industrial innovation, CETIAT is a major reference in the industrial ecosystem, in France and abroad. Its expertise is in line with major societal challenges, such as the increase of energy efficiency, the development of renewable energies and the reduction of environmental impacts. It therefore plays an essential role in strengthening the competitiveness of the French industry.

WHO ARE WE?

Our status: The industrial technical centres were created by the French law of the 22nd of July 1948. They are public-interest organisations with a public service mission. Since 2004, they have been governed by the French research code and provide industry with the resources and skills to improve competitiveness. Industrial technical centres are major contributors to technology transfer from research to industry.

Our financing: tax (TFA) paid by member companies, some 343 industrial companies in the fields of heating, air conditioning and air handling.

OUR FIELDS OF EXCELLENCE

www.cetiat.fr - www.formation.cetiat.fr
www.industrie.cetiat.fr - www.metrologie.cetiat.fr

OUR METHODS

We carry out collaborative actions* for our members companies:

- These actions are defined by our 343 member companies;
- They are financed by assigned tax (TFA) and by public-private partnerships;
- The results are owned jointly by member companies and co-financiers.

* Made up of studies, research, standardisation work, regulatory and certification work, distribution and monitoring.

We offer personalised support to our clients:

- Through services directly requested and financed by a client;
- Including work of a confidential nature;
- Producing results that remain the property of the client.

FOR INDUSTRIAL INNOVATION

OUR AMBITION: REMAIN THE REFERENCE IN OUR FIELDS

OUR FIELDS

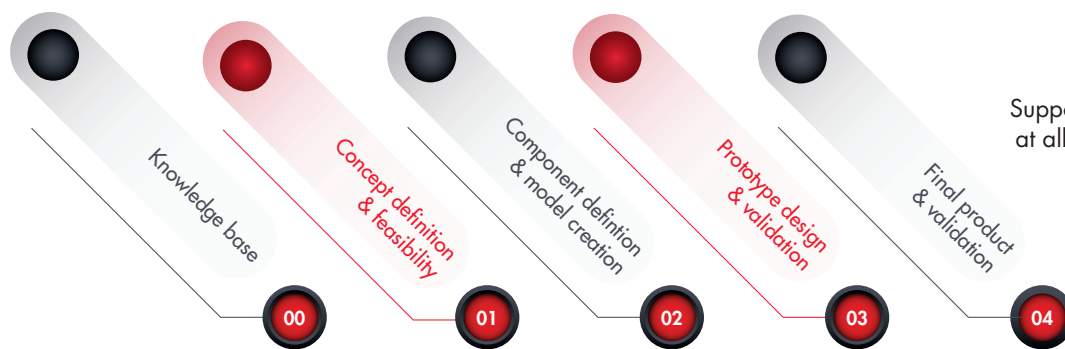

- R&D* including studies
- Technical services: tests, calibration, measurements, analyses and assessments
- Technology watch and dissemination of information, with the publication of practical guides and notes
- Inter and intra-company training programmes
- Testing for product certification
- Standardisation through our presence in national and international bodies

* CETIAT is eligible for the French CIR (Research Tax Credits).

OUR MISSION

From ideas to commercialisation

Supporting industrial innovation at all levels of conception, from design to development of products and processes.

OUR VISION

Providing our expertise to support:

- Energy efficiency
- Renewable energy development
- Indoor environment quality in terms of noise, thermal comfort and air quality
- Device functionality
- Operator and user safety
